

Remarks/Arguments

This case has been reviewed and analyzed in view of the Official Action dated 5 May 2005. In the Official Action, the Examiner has found three inventions, namely, Group I directed to Claims 1-4 drawn to an apparatus and a method for capturing a plurality of digital color images under controlled lighting conditions including a moveable enclosure means, a controlled lighting means, and a digital color capture means; Group II directed to Claims 5-14 drawn to an apparatus and a method for capturing a plurality of appropriately colored digital images including a moveable lighting control enclosure means, a digital color image capture means, a color correction specification means, and a color correction means, a calibration means of digital color image capture means, and a color palette means; and Group III directed to Claims 15-26 drawn to an apparatus and a method for providing a plurality of appropriately colored digital images including a moveable lighting control enclosure means, a digital color image capture means, a color correction specification means, and a color correction means, an image storage means, an image display means, a data server device, a color-calibrated monitor, a calibration means of digital color image capture means, and a color palette means. The Examiner has required that Applicant chose one Group for further prosecution.

By this Amendment and Response, Applicant has canceled Claims 5-26 and elects Claims 1-4 for further prosecution.

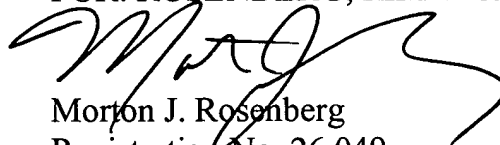

MR1035-983

Appln. No. 10/050,813

Reply to Office Action dated 5/5/2005

It is now believed that the subject patent application has been placed in condition for examination and such action is respectfully requested.

Respectfully submitted,
